The main objective of the Fund is to support the efforts made by the Member States to improve the management of return in all its dimensions through the use of the concept of integrated management and by providing for joint actions to be implemented by Member States or for national actions that pursue Community objectives under the principle of solidarity, taking account of Community legislation in this field and in full compliance with fundamental rights.

The European Commission has adopted the Strategic Guidelines for the period 2008–2013 (Commission Decision of 30 November 2007 implementing Decision No 575/2007/EC of the European Parliament and of the Council). On the basis of the Strategic Guidelines, Multi-annual Programme for the period 2008 – 2013 was created and approved by the European Commission on 22 December 2008. The Multi-annual Programme has been implemented through successive, detailed annual programmes. Annual programmes are prepared in advance and submitted for approval to the European Commission. The latter has already approved the last Annual Programme for the period 2008–2013.

In the framework of Annual Action Programmes, measures are carried out under the following priorities:

- Priority 1: Support for the development of a strategic approach to return management by Member States;
- Priority 2: Support for the cooperation between Member States in return management;
- Priority 3: Support for specific innovative (inter)national tools for return management;
- Priority 4: Support for Community standards and best practices on return management.

Each Annual Programme consists of two parts: **awarding mode** and **executing mode**. The procedure based on an awarding mode is open to a large number of potential beneficiaries. In the procedure of an executing mode, specific projects and implementing entities are determined for each Annual Programme. The executing mode is aimed at projects which, due to a de jure monopoly or security reasons, cannot be selected using the call for tenders procedure.
